Takeout food packages supply in service

Countless schools and kindergartens had to close their doors to pupils due to the impact of the novel coronavirus. One of TFT's affiliated countries Kenya was no exception; however, Covid-19 could not stop TFT staff from supporting the local students when it comes to receiving safe, healthy and abundant food.

We are able to provide the ingredients to make porridge at home and we have the children bring the food packages twice a week now. The children told us, "I wish I can see my school friends soon!" and some said they miss eating at school.

When schools are closed, teachers paid visits to children at their home and gave lessons to them on how to stay safe in the COVID-19 situation.

Together with more hand washing facilities being set up in the village, it became easier for people to access clean water.

Kenya mandated people to put on masks in the public. However, wearing a mask is not a familiar habit in the region.

For the whole village to get high quality masks easier, training on how to manufacture masks also took place. Each mask costs about US\$0.3-0.5, cloth masks are washable and reusable so it is affordable for the locals.

One table connecting the world

When you dine at TABLE FOR TWO, you never dine alone.

TABLE FOR TWO is a social initiative that addresses the conflicting issues of hunger and obesity through a unique "meal-sharing" program.

On every second of April the "TABLE FOR TWO (Table 4-fo(u)r 2-two) Day" event takes place in NGK's cafeterias. To raise awareness of TFT, for each person who orders TFT meals finds a free pamphlet of the program enclosed in their paper pack veggie juice.

At the Yokohama office of Sumitomo Electric Industries, on April 2 (Four Two) they provided a special menu for the event. The name of the dish, and illustrated numbers for calories were designed to match 'four' and 'two.' At that event, TFT was able to make it to 100,000 meals in total. What a blessed day!
