

TFT TABLE FOR TWO

From The Other Side of The Table

Castillejos, The Philippines

Continued support with food packs

The COVID-19 pandemic is in the 3rd year. Schools in 23 countries globally still have not fully opened face-to-face classes and the Philippines is one of these countries. In February 2022, some schools in the country resumed face-to-face classes with a limited number of students. But the Balaybay school that TFT supports still does not have a plan to resume face-to-face classes.

Continuing from last year, the school meal program delivered food packs to all the students since many families of Balaybay are facing economic challenges. The first distribution of food packs in this year was done in February 2022 and 847 students received food packs.

Every week, parents or guardians come to school to submit their children's homework and pick up the next week's self-study modules. The submission of homework is a requirement for the promotion to next grade or graduation. All parents or guardians come to pick up modules and not a single student has dropped out so far.

Teachers at the Balaybay school are preparing food packs for distribution. Since students do not come to school, the teachers don't know the health condition of their students. They communicate with students and parents through social media. However they all hope to resume face-to-face classes as soon as possible.

In the corporate cafeteria of Shinnihonseiyaku, the decision to close the salad bar as a counter-measure against infectious diseases prompted these vegetables to be used in other ways, mainly as part of the TFT menu. One of them is the bento box lunch, which offers a wide variety of items including a wide variety of vegetables. The colorful lunch box is appealing to the eye. The company is committed to supporting its employees' health.

One table connecting the world

When you dine at TABLE FOR TWO, you never dine alone.

The Philippines

TABLE FOR TWO is a social initiative that addresses the conflicting issues of hunger and obesity through a unique "meal-sharing" program.

At Nagoya University, students and its CO-OP collaborated to plan and sell "TFT Manpuku (=full stomach) Lunch Box". In addition to creating menus and having tasting events, students put effort into promotional activities, resulting in a total of 1,210 meals sold from January to March. This is the first collaborative menu realized in two years through trial and error while activities in the school cafeteria were restricted due to the pandemic of COVID-19.
